Production date of the Key Information Document (KID) : 22.03.2024

Warning : You are about to purchase a Product that is not simple and may be difficult to understand.

What is this Product ?

Type

This Product is a Luxembourg investment fund, Investment company with variable capital (SICAV) – Specialised Investment Fund (SIF).

Term

The lifespan of this Product is not limited.

Objectives

The Product has as investment objective to offer a wide range of investments through its Product, aiming at providing a favourable rate or return, while controlling risks.

For each Product, the investment objectives and policies and the particulars offering of the Shares and of the management and administration of the Product are set out in the relevant Product's Supplement under Appendix I.

The investment objectives and policies of the Product may be amended by the General Partner at its discretion, prior approval of the CSSF. In such a case, the relevant Shareholders will be informed accordingly pursuant to the procedure set by regulatory practice.

The Product neither takes into account the EU criteria for Sustainable Investments, sustainability risks or principal adverse impact on sustainability factors under the SFDR, nor the EU Taxonomy Regulation and criteria that define environmentally sustainable economic activities thereunder in its investment objective, strategy and process. Currently the Product is not in a position to take into account such sustainability risks over investment decisions as it does not possess an updated policy integrating those risks. In addition, the AIFM considers that the application of ESG criteria to the investment process would likely constraint the universe of assets in which the Product is investing. As a result, investments following ESG criteria could perform differently from similar investments not complying with these non-financial criteria. However, the General Partner of the Product has considered the undeniable relevance of the issues that are at the basis of the below identified EU Regulations and is in a committed process - in collaboration with the promoters of the Product - to review and adapt its investment policy in order to align it, insofar as possible, with the values that those EU Regulations aim to foster.

The Product is not marketed with a sustainable investment objective nor promotes sustainable characteristics as foreseen under the SFDR, unless otherwise provided for a Product in the relevant Product's Supplement.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Should sustainable investments become part of the investment objective, strategy and process of the SIF, all relevant investment policies and the Issue Document will be amended accordingly.

Intended retail investor

The target investor of the Product is focused on well-informed investors within the meaning of Article 2 of the SIF Law being any institutional investor, any professional investor or any other investor who/which meets the following conditions:

- he/she/it has confirmed in writing that he/she/it adheres to the status of well-informed investor, and
- either he/she/it invests a minimum of €125,000.- in the Product, or he/she/it has obtained an assessment made by a credit institution, within the meaning of Directive 2006/48/EC, or by an investment firm within the meaning of Directive 2004/39/EC, or by a management company within the meaning of Directive 2009/65/EC certifying his/her/its expertise, his/her/its experience and his/her/its knowledge in adequately appraising an investment in the Product.

The latest version of the PRIIP KID is available on www.ygluxembourg.lu. The issue document of this Product as well as the annual report may be obtained at the registered office of the Product.

What are the risks and what could I get in return ?

Risk Indicator

← Lower risk Higher risk →

The summary risk indicator assumes you keep the Product until maturity end of the recommended holding period (6 years).

The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Significant risk(s) for the Product not taken into account in this indicator include the following:

Interest Rate Risk: By definition, interest rate risk corresponds to the possibility for an investment fund to be negatively impacted by a change in interest rates. The interest rate risk can thus manifest itself through a reduction in financial income in the event of a fall in interest rates and/or an increase in financial expenses in the event of a rise in interest rates. An increase in interest rates may cause the value of fixed-income securities held by the Fund to decline.

"High yield" bonds risk: The Product will invest in sub-investment grade bonds. These bonds may produce a higher level of income than investment grade bonds but at a higher risk to your capital.

Investments into other UCI/UCITS: A Product which invests in other collective investment schemes will not have an active role in the day-to-day management of the collective investment schemes in which it invests. Moreover, a product will generally not have the opportunity to evaluate the specific investments made by any underlying collective investment schemes before they are made. Accordingly, the returns of a product will primarily depend on the performance of these unrelated underlying product managers and could be substantially adversely affected by the unfavourable performance.

Risk linked to the holding of convertible bonds: Convertible bonds are hybrid securities between debt and equity, which in principle allow holders to convert their interest in bonds into shares of the issuing company at a specified future date. Investment in convertibles will result in greater volatility than bond investments in standard bonds.

Derivative for hedging purpose: The use of derivatives for hedging in a rising market may restrict potential gains.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product over the last 11 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Investment EUR 10,000

| The recommended holding period is 6 years. | | If you exit after 1 year | 6 years |
|--|---|--------------------------|------------|
| Scenarios | | | |
| Minimum | There is no minimum guaranteed return. You could lose some or all of your investment. | | |
| Stress scenario | What you might get back after costs | EUR 8,100 | EUR 7,400 |
| | Average return each year | -19.0% | -4.9% |
| Unfavourable scenario | What you might get back after costs | EUR 9,260 | EUR 10,070 |
| | Average return each year | -7.4% | 0.1% |
| Moderate scenario | What you might get back after costs | EUR 10,430 | EUR 12,810 |
| | Average return each year | 4.3% | 4.2% |
| Favourable scenario | What you might get back after costs | EUR 12,360 | EUR 13,890 |
| | Average return each year | 23.6% | 5.6% |

This table shows the money you could get back over the recommended holding period of 6 years, under the different scenarios, assuming you invest EUR 10,000.

Unfavourable scenario : this scenario occurred for an investment between 12/2021 and 12/2023.

Moderate scenario : this scenario occurred for an investment between 01/2015 and 01/2021.

Favourable scenario : this scenario occurred for an investment between 01/2016 and 01/2022.

What happens if A&G Luxembourg AM, S.A. is unable to pay out ?

The Product's ability to pay out would not be affected by the insolvency of the manufacturer. You may however face a financial loss should the Depositary default on its obligations. Such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Product. There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

What are the costs ?

The person advising on or selling this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario ;
- EUR 10 000 per year is invested

| Investment EUR 10,000 | If you exit after 1 year | If you cash in after 6 years (recommended holding period) |
|------------------------|--------------------------|---|
| Total costs | EUR 133 | EUR 1,053 |
| Annual cost impact (*) | 1.3% | 1.4% each year |

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 5.60% before costs and 4.21% after costs.

We may share costs with the person selling the Product to you in order to cover the services they provide to you. If so, this person will inform you of the amount.

Composition of Costs

Investment EUR 10,000 and annual cost impact if you exit after 1 year

| One-off costs upon entry or exit | | If you exit after 1 year |
|---|--|--------------------------|
| Entry costs | We do not charge an entry fee. | EUR 0 |
| Exit costs | We do not charge an exit fee for this Product (but the person selling the Product may do). | EUR 0 |
| Ongoing costs (taken each year) | | |
| Management fees and other administrative or operating costs | 1.23% of the value of your investment per year. The impact of the costs that we take each year for managing this Product. This figure is based on actual costs over the past year. | EUR 123 |
| Transaction costs | 0.10% of the value of your investment per year. The impact of the costs of us buying and selling underlying investments for this Product. The actual amount will vary depending on how much we buy and sell. | EUR 10 |
| Incidental costs taken under specific conditions | | |
| Performance fees and carried interest | Description: From 0% to 10% performance fee, subject to a high water mark principle | EUR 0 |

These tables show the impact the different costs have on the investment return you might get back at the recommended holding period and the meaning of the different cost categories.

If you invest in this Product in the context of a life insurance contract or capitalisation contract, this document does not take into account the fees relating to this contract.

How long should I hold it and can I take the money out early ?

Recommended holding period : 6 years

This Product is designed for longer term investments; you should be prepared to stay invested for at least six years. However, you can redeem your investment without penalty at any time during this time, or hold the investment longer.

Redemptions are possible on each Valuation Day when notified to the Administrative Agent before 12.00 a.m., Luxembourg time, on the Business Day preceding the Valuation Day; it will take 3 Business Days for the remit of redemption proceeds.
