What is this Product ?

Type

This Product is a Luxembourg investment fund, Investment company with variable capital (SICAV) – Specialised Investment Fund (SIF).

Term

The lifespan of this Product is not limited.

Objectives

For the purposes of AIFM reporting following the AIFM regulation, the predominant investment strategy of the Product will be hedge fund strategy and the sub-strategy will be 100% other hedge fund strategies.

The Product seeks to accomplish this objective by investing, either directly or indirectly, in a diverse range of eligible investments, not restricted in accordance to geographical area or sector. The Product will primarily invest in listed equities of small, medium and large-sized companies; bonds, including, but not limited to, convertible bonds, contingent bonds, high yield bonds, ETN, fixed rate and floating securities, zero-coupon bonds and treasury bonds, with no particular rating, issued by governments, corporations and other national or supranational bodies; open-ended Investment Funds, including ETFs, and Fund of Funds; structured products, guaranteed or not; money market instruments and deposits.

The Product may also invest in closed-ended Investment Funds and Fund of Funds, including, but not limited to Hedge Funds, SICARs, private equity funds, real estate funds and REITS, as well as in unlisted equities, unlisted debt issued by or loans granted to entities. These investments shall not represent more than 50% of the assets of the Product.

Intended retail investor

The target investor of the Product is focused on well-informed investors within the meaning of Article 2 of the SIF Law being any institutional investor, any professional investor or any other investor who/which meets the following conditions:

- he/she/it has confirmed in writing that he/she/it adheres to the status of well-informed investor, and
- either he/she/it invests a minimum of €125,000.- in the Product, or he/she/it has obtained an assessment made by a credit institution, within the meaning of Directive 2006/48/EC, or by an investment firm within the meaning of Directive 2004/39/EC, or by a management company within the meaning of Directive 2009/65/EC certifying his/her/its expertise, his/her/its experience and his/her/its knowledge in adequately appraising an investment in the Product.

Practical information

Custodian: Edmond de Rothschild (Europe)

Redemptions are possible on each Valuation Day when notified to the Administrative Agent before 12.00 a.m., Luxembourg time, 3 Business Days preceding the Valuation Day; it will take 30 Business Days for the remit of redemption proceeds.

The latest version of the PRIIP KID is available on www.aygluxembourg.lu. The issue document of this Product as well as the annual report may be obtained at the registered office of the Product.

What are the risks and what could I get in return ?

Risk Indicator

1	2	3	4	5	6	7
---	---	---	---	---	---	---

←----->
Lower risk Higher risk

The summary risk indicator assumes you keep the Product until maturity end of the recommended holding period (6 years).

The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the capacity of the distributor to pay you.

Significant risk(s) for the Product not taken into account in this indicator include the following:

"High yield" bonds risk: The Product will invest in sub-investment grade bonds. These bonds may produce a higher level of income than investment grade bonds but at a higher risk to your capital.

Investments in Products of Hedge Products: Investments in Products of Hedge Products are subject to specific risks, particularly linked to the valuation of the NAV of such Products, to their scarce liquidity and to the frequent and sophisticated use of the leverage effect.

Risk linked to the use of derivative instruments: The Product uses derivative instruments, which means financial instruments whose value depends on those of an underlying asset. Therefore, fluctuations in the price of an underlying asset, even if minor, could lead to significant variations in the price of the corresponding derivative instrument. With the use of over-the-counter derivatives, there is a risk that the counterparty to the transactions will wholly or partially fail to honour its contractual obligations. This may result in a financial loss to the Product.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Product's returns because the Product may be unable to transact at advantageous times or prices. This can be the result of shocks of unprecedented intensity and severity such as but not limited to pandemics and natural disasters.

Risk linked to the holding of contingent convertible bonds (CoCos): Contingent convertible bonds can be automatically convert into shares or be written down if the financial strength of the issuer falls in a certain way. This may result in substantial or total losses of the bond value.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product over the last 11 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Investment EUR 10,000

The recommended holding period is 6 years.		If you exit after 1 year	6 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress scenario	What you might get back after costs	EUR 4,420	EUR 3,900
	Average return each year	-55.8%	-14.5%
Unfavourable scenario	What you might get back after costs	EUR 8,510	EUR 9,540
	Average return each year	-14.9%	-0.8%
Moderate scenario	What you might get back after costs	EUR 10,460	EUR 12,890
	Average return each year	4.6%	4.3%
Favourable scenario	What you might get back after costs	EUR 12,700	EUR 14,330
	Average return each year	27.0%	6.2%

This table shows the money you could get back over the recommended holding period of 6 years, under the different scenarios, assuming you invest EUR 10,000.

Unfavourable scenario : this scenario occurred for an investment between 12/2021 and 12/2023.

Moderate scenario : this scenario occurred for an investment between 05/2016 and 05/2022.

Favourable scenario : this scenario occurred for an investment between 12/2015 and 12/2021.

What happens if A&G Luxembourg AM, S.A. is unable to pay out ?

The Product's ability to pay out would not be affected by the insolvency of the manufacturer. You may however face a financial loss should the Depositary default on its obligations. Such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Product. There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

What are the costs ?

The person advising on or selling this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario ;
- EUR 10 000 per year is invested

Investment EUR 10,000	If you exit after 1 year	If you cash in after 6 years (recommended holding period)
Total costs	EUR 190	EUR 1,537
Annual cost impact (*)	1.9%	2.0% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 6.30% before costs and 4.32% after costs.

We may share costs with the person selling the Product to you in order to cover the services they provide to you. If so, this person will inform you of the amount.

Composition of Costs

Investment EUR 10,000 and annual cost impact if you exit after 1 year

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	EUR 0
Exit costs	We do not charge an exit fee for this Product (but the person selling the Product may do).	EUR 0
Ongoing costs (taken each year)		
Management fees and other administrative or operating costs	1.61% of the value of your investment per year. The impact of the costs that we take each year for managing this Product. This figure is based on actual costs over the past year.	EUR 161
Transaction costs	0.29% of the value of your investment per year. The impact of the costs of us buying and selling underlying investments for this Product. The actual amount will vary depending on how much we buy and sell.	EUR 29
Incidental costs taken under specific conditions		
Performance fees and carried interest	Description: From 0% to 10% performance fee, subject to a high water mark principle	EUR 0

These tables show the impact the different costs have on the investment return you might get back at the recommended holding period and the meaning of the different cost categories.

If you invest in this Product in the context of a life insurance contract or capitalisation contract, this document does not take into account the fees relating to this contract.

How long should I hold it and can I take the money out early ?

Recommended holding period : 6 years

This Product is designed for longer term investments; you should be prepared to stay invested for at least six years. However, you can redeem your investment without penalty at any time during this time, or hold the investment longer.

Redemptions are possible on each Valuation Day when notified to the Administrative Agent before 12.00 a.m., Luxembourg time, 3 Business Days preceding the Valuation Day; it will take 30 Business Days for the remit of redemption proceeds.

How can I complain ?
